## DETAILED ACTION

### *Response to Amendment*

Amendment filed on 03/15/07 has been entered.

Claims 1-6, 8-10 are present for examination.

Claim 7 is cancelled.

### *Response to Arguments*

Applicant's arguments with respect to claims 1-6, 8-10 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 8-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yeager et al. (US 6,224,573).

A vaginal or rectal applicator comprising: an applicator barrel 14 comprises a medication chamber 50 or 84 (Fig. 7) at the proximal end of the applicator; wherein the medication chamber has a smaller diameter than the diameter of the applicator barrel and wherein the medication chamber is designed to contain up to 1mL of a pharmaceutical. It is noted that the medication/dispensing chamber can have a larger or smaller inner to contain up to 1mL or any amount of medication (col. 5, lines 10-14); the pharmaceutical composition is in form selected from the group consisting of powder, gel, cream or lotion (col. 1, lines 10-20); and wherein the proximal end of the applicator contains an opening 90; a plunger 16; a plunger tip 92; an applicator cap 12 is removable from the proximal end of the applicator barrel; a flange

64, 68; the applicator cap forms an air-tight seal with the applicator barrel (col. 2, lins 7-15, col. 3, lines 5-29); the plunger tip forms an air-tight seal with the applicator barrel (col. 6, lines 41-61).

Regarding claims 6, 8-10, they encompass the same scope of the invention as to that of claims 1-5 except they are drafted in method format instead of apparatus format. These steps must be performed in order to obtain the device. Therefore, the method of performing or transvaginal or transrectal drug delivery would be inherent to the shown structure of the device.

### **Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
